

Nordic-style cable tray installation manufacturer

AI Overview

Nordic Wire Tray, Meka, and Siltec are leading Nordic manufacturers offering high-quality, easy-to-install cable trays. Nordic Wire Tray specializes in wire trays and cable management systems under the X-Tray brand, designed for fast and flexible installation. Their trays feature the longest spacing between support brackets, reducing the number of parts and installation time. The system is highly customizable, allowing wire trays to be cut, bent, and adapted to project-specific requirements. Installation requires only an M8 bolt, bolt cutters, and a 13 mm wrench, making it simple and efficient. X-Tray products are tested to meet IEC 61537 standards and are suitable for demanding environments, with options in stainless steel and various surface treatments for durability and corrosion resistance (Nordic Wire Tray).

Meka is a Nordic manufacturer with over 40 years of experience in cable support systems. Their product range includes galvanized steel and acid-proof steel cable ladders, wire mesh trays, and aluminum-frame systems. Meka's KS80 cable ladders are designed for high load capacities and wide spans, with tube side profiles that protect against dust, dirt, and humidity, making them suitable for industrial and outdoor installations (Meka).

Siltec offers stainless steel cable trays with lengths of 3000 mm and widths from 25 mm to 600 mm. Their trays are designed for easy installation and later extension, with patented lock systems that allow fast cable installation and exchange. Siltec provides custom-sized trays and solutions for both light and heavy-duty cabling, including horizontal trays for large-width applications, ensuring flexibility and durability in building and industrial projects (Siltec).

Summary For Nordic easy-installation cable trays, Nordic Wire Tray is ideal for projects requiring customization, fast assembly, and premium quality, while...
