

North Macedonia Galvanized Cable Tray Specifications

AI Overview

Electro-galvanized cable trays in North Macedonia generally follow international standards, primarily IEC 61537, ensuring corrosion resistance, mechanical strength, and safe cable management. Applicable Standards In North Macedonia, electro-galvanized cable trays are typically designed and manufactured according to IEC 61537:2023, which specifies requirements for cable tray systems used to support electrical cables and instrumentation. This standard covers:

- Material specifications:** Including galvanized steel, stainless steel, aluminum, and composite materials suitable for various environments ().
- Mechanical strength:** Load-bearing capacity, deflection limits, and structural integrity for ladder, perforated, and solid-bottom trays.
- Corrosion protection:** Electro-galvanized coatings provide a protective layer to resist rust and environmental degradation, suitable for indoor and moderately corrosive environments ().
- Dimensions and configurations:** Standardized widths, heights, and slot patterns for efficient cable routing and installation flexibility.
- Accessories and fittings:** Brackets, couplers, bends, and supports must comply with IEC 61537 to ensure safe and stable installation ().

Local Manufacturing and Compliance Several manufacturers in North Macedonia produce electro-galvanized cable trays that adhere to international quality standards: Brilltech Engineers Pvt. Ltd offers hot-dip and electro-galvanized ladder and perforated cable trays, emphasizing corrosion resistance and structural strength (). Jeetmull Jaichandlall (P) Ltd. provides galvanized cable trays in various sizes and configurations, ensuring compliance with industry standards and durability requirements (). These suppliers ensure that products meet internationally recognized standards, even if North Macedonia does not have a separate national s...
