

PCDN Aggregation Switch

Overview

They support link aggregation protocols such as Link Aggregation Control Protocol (LACP) and Static Link Aggregation, which allow multiple physical links to be combined into a single logical connection. This enhances bandwidth, redundancy, and ensures failover capability in. An 8-port, Layer 2 switch made for 10G SFP+ connections. High-performance 10G SFP modules for optimal connectivity. By bundling multiple network connections into a single high-bandwidth link, aggregation switches help. Shipping fee and delivery date to be negotiated. SANCHIT-100 is a Layer-2 Managed Ethernet Switch/Aggregation Switch, supporting 24 x 10/100/1000BaseT electrical interfaces for interconnecting servers, clients, RAS, routers and other devices used in the internet or intranet. 4W/30W per port) power feed is also supported. A: We supply ONUs/OLTs/SDH/DWDM/Switches/Routers/Wireless series of Products including Q2. What is your terms of payment?

A: T/T 30% as deposit, and 70% before delivery. How about. Customers have the right to withdraw from the contract within 14 days without providing any reason. Products must be returned in good condition, unused, and in their original packaging, except in cases of quality defects.
