

Painting the steel channel of the distribution box

Overview

Use Fire-Resistant Paint: Pick paint that won't catch fire and doesn't conduct electricity. This helps prevent fires caused by heat. Allow Heat to Escape: The box gets warm when it's working. Brush painting: The traditional and most basic method involves using a paintbrush to directly apply paint onto the channel's surface. Here we will provide you with a comprehensive guide to steel structure painting to help you better complete the work. What should I do when there are scratches on the shell of the distribution box?

1. Surface polishing, apply polishing wax liquid evenly on the surface, wipe it. Painting the exterior of electrical equipment is generally acceptable, but it is important to check local building regulations and ensure safety. However, there are certain. At E-abel, we combine advanced production equipment, strict quality control, and international certification standards to provide high-performance distribution boxes tailored for global markets.
