

PoE with SFP switch

AI Overview

PoE switches with SFP ports combine power delivery over Ethernet with fiber uplink flexibility, suitable for both small and enterprise networks. Overview PoE switches with SFP ports allow you to deliver both data and electrical power to devices such as IP cameras, wireless access points, VoIP phones, and access control systems, while also providing fiber connectivity for long-distance or high-speed uplinks. SFP slots support both single-mode and multi-mode fiber modules, enabling flexible network expansion.
