

Price increase of passive optical components

Overview

From Yageo, the leading Taiwanese company, firing the first shot in the 2026 price increase for ferrite beads, to Fenghua Advanced Technology, a representative of mainland Chinese capital, launching the second round of price increases this year for all product categories. From Yageo, the leading Taiwanese company, firing the first shot in the 2026 price increase for ferrite beads, to Fenghua Advanced Technology, a representative of mainland Chinese capital, launching the second round of price increases this year for all product categories. At the beginning of 2026, the global passive components industry has once again entered the spotlight as leading manufacturers announce new rounds of price increases. Yageo Group, one of the world's largest passive component suppliers, has confirmed price adjustments for selected ferrite bead. The global passive optical component market was valued at USD 58. The market is expected to grow from USD 65. 4 billion in 2035, at a CAGR of 13. The insights in this article are based on real market observations, sourcing experience, and daily. Price increases have become the new normal for passive components.

Passive Component Prices Rise as MLCC Demand Tightens 2026

The global passive component market is entering another period of price inflation as stronger multilayer ceramic capacitor (MLCC) demand, constrained manufacturing capacity and

May 2026 Electronic Components Market Insights

Edgewater Research's latest IP& E update argues that fears of a prolonged "hybrid for longer" AI cycle and excessive copper exposure are

Passive Optical Components Market Size, Analysis, 2035

PASSIVE OPTICAL COMPONENT MARKET OVERVIEW The Passive Optical Components Market globally is expected to be valued at USD 40.75 Billion in 2026. It is forecasted to

Passive Optical Components Market Growth & Trends

As 5G continues to expand globally, the demand for high-capacity, low-latency communication solutions supported by passive optical components is expected to grow, presenting lucrative opportunities for

Passive Optical Component Market Size & Share 2026

The global passive optical component market was valued at USD 58.4 billion in 2025. The market is expected to grow from USD 65.1 billion in 2026 to USD

Passive Optical Components Market Research Report

These trends are prompting both established telecom operators and new entrants to invest in state-of-the-art passive optical solutions, fueling market

Global and Regional Passive Optical ComponentsMarket 2025

The demand for higher bandwidth and lower latency is pushing adoption of advanced passive components across North America and Asia-Pacific regions, with the data center optical

Passive Optical Components Market Market Size

This comprehensive report provides an in-depth analysis of market trends, drivers, and forecasts, helping you make informed business decisions. The report

How the Passive Component Price Increase Changed

How the Latest Passive Component Price Increase Is Reshaping the Market In January 2026, the passive component market entered a new phase as

Global Passive Optical Chip Market Size, Growth

Passive Optical Chip Market Overview 2026-2033 The Passive Optical Chip Market represents a critical segment within the broader optical

Passive Optical Component Market Size, Share

The passive optical component market continues to grow at a steady rate driven by next-generation network requirements, and digital modernization combined with

Passive Components Price Hikes in 2026: Causes,

This article provides a comprehensive industry analysis, focusing on cost drivers, supply-demand dynamics, and the medium-term outlook for

Passive Optical Components Market Forecast Points Higher Toward

Global market analysis and forecast for passive optical components from 2026 to 2035. Explore demand drivers, key sectors, regional outlook, and competitive landscape.

Passive Optical Components Market Research Report 2034

The Passive Optical Components market was valued at \$4.9 billion in 2025 and is projected to reach \$9.69 billion by 2034, growing at 7.8% CAGR.

Global and Regional Passive Optical ComponentsMarket 2025

Passive Optical Components Global Passive Optical Components market was valued at USD 9.21 billion in 2024 and is projected to reach USD 20.45 billion by 2032, at a CAGR of 10.8%.

Price increases have become the new normal for passive components.

Price increases have become the new normal for passive components. Entering 2026, the passive components industry, the "silent cornerstone" of the global electronics and information

Passive Optical Components Market Market Size

The growth in the passive optical components market is driven by several factors including the global expansion of fiber-optic broadband, increasing data center

Passive Components Price Hikes 2026 | Industry Analysis And Market

An in-depth analysis of passive component price increases in 2026, covering ferrite beads, inductors, tantalum capacitors, key suppliers, cost drivers, and market outlook.

How the Passive Component Price Increase Changed

On January 16, Yageo released a notice confirming a resistor price increase, followed shortly by Ta-I Technology and Walsin Technology. This

Why Fiber Optic Prices Are Rising in 2026

The global fiber optic industry is entering a new pricing cycle. Over the past several months, upstream material costs and supply chain constraints have pushed fiber prices upward, directly impacting

Global Passive Optical Components Market Insights, Forecast to 2030

This report focuses on the Passive Optical Components sales, revenue, market share and industry ranking of main manufacturers, data from 2019 to 2024. Identification of the major

Passive Optical Chip Market 2025

Intense Price Competition Squeezes Profit Margins. The passive optical component market has become increasingly competitive, with average selling prices declining 8-12% annually due to

Passive Optical Components Analysis 2026 and Forecasts 2034:

The Passive Optical Components market is booming, projected to reach \$844.9 million by 2025 with an 8.2% CAGR through 2033. Driven by 5G, cloud computing, and FTTH, this report analyzes market

Passive Optical Component Market Size, Share and Forecast 2032

The Passive Optical Component Market is projected to grow from USD 38100 million in 2024 to an estimated USD 152187.8 million by 2032, with a CAGR of 18.9% from 2024 to 2032.

How Metal Prices Are Driving Passive Component Price

Rising prices of silver, gold, palladium and other critical metals are no longer a background macro topic – they are now directly visible in official

Why Electronic Component Costs Are Rising in 2026 — and How to

Electronic component costs are climbing across semiconductors, passives, and optoelectronics in 2026. Learn what is driving prices up and proven strategies to protect your margins.
