

Price of 50x120 cable trays

AI Overview

The price of a 50x120 mm cable tray typically ranges from \$25 to \$60 per meter, depending on material, finish, and supplier.

Factors Affecting Price

Material: Hot-dip galvanized steel, stainless steel, and PVC are common options. Stainless steel is more expensive due to corrosion resistance, while PVC is generally cheaper and lighter.

Finish: Hot-dipped galvanized trays cost more than pre-galvanized or powder-coated trays because of enhanced durability and corrosion protection.

Length: Standard cable tray lengths are usually 2–3 meters. Prices are often quoted per meter or per standard length.

Type: Ladder, perforated, or solid-bottom trays may vary in price. Ladder trays are common for heavy power cables, while perforated trays are lighter and easier to install.

Estimated Price Range

Hot-dip galvanized steel ladder tray (50x120 mm): \$30–\$50 per meter.

Stainless steel tray (50x120 mm): \$50–\$60 per meter, depending on grade (304 or 316) and supplier.

PVC or plastic tray (50x120 mm): \$25–\$35 per meter, suitable for indoor or light-duty applications.

Additional Considerations

Accessories: Couplers, bends, tees, and risers are sold separately and can add \$5–\$15 per piece.

Bulk Orders: Purchasing in larger quantities may reduce the per-meter cost.

Supplier Variations: Prices vary by region and supplier; contacting local distributors like RS Components, CEF, or Direct Channel can provide exact quotes. For a precise quote, it is recommended to specify the material, finish, and required length to suppliers, as these factors significantly influence the final price.
