

Price of 700x200 cable trays

AI Overview

The price of a 700x200 mm cable tray typically ranges from \$50 to \$150 per 2.4-meter section, depending on material, design, and supplier.

Pricing Overview 700x200 mm cable trays are commonly used in commercial, industrial, and infrastructure electrical installations to support and organize power, control, and communication cables. The price depends on several factors:

- Material:** Carbon steel trays are strong and durable, while aluminum trays are lightweight and corrosion-resistant. Stainless steel or alloy trays are suitable for harsh or hygienic environments.
- Design:** Ladder-type trays, perforated trays, wire mesh baskets, and solid-bottom trays differ in ventilation, cable support, and installation flexibility.
- Length:** Standard sections are usually 2.4 meters long, and pricing is often quoted per section.
- Supplier and Quantity:** Bulk orders or wholesale purchases can reduce the per-unit cost.

Estimated Price Range

- Hot-dip galvanized ladder trays: Approximately \$50–\$100 per 2.4-meter section.
- Aluminum or stainless steel trays: Typically \$80–\$150 per 2.4-meter section, depending on thickness and corrosion resistance.

Fittings and accessories: Additional costs apply for bends, tees, reducers, and mounting hardware, usually priced per piece.

Additional Considerations

- Corrosion resistance:** For outdoor or humid environments, galvanized or stainless steel trays are recommended.
- Installation:** Ladder trays allow easy cable entry and exit, while perforated or solid trays may require additional planning for airflow and cable support.
- Supplier selection:** Prices vary by supplier; platforms like Alibaba, Grainger, and McMaster-Carr offer both retail and bulk options.

For precise pricing, it is advisable to request a quotation from suppliers specifying the material, length, and quantity required. This ensures accurate cost estimates for your project.
