

# Price of Distribution Boxes and Charging Cabinets

## AI Overview

Distribution boxes typically range from \$50 to \$1,500 depending on capacity and features, while charging cabinets vary from \$100 to over \$1,000 based on ports and technology.

**Distribution Boxes** Residential and small commercial units generally start around \$50–\$200 for basic single-phase boxes with limited circuits, while larger three-phase or industrial-grade units can cost \$500–\$1,500 or more, especially when incorporating smart monitoring, surge protection, or weatherproof enclosures. Prices are influenced by:

- Voltage and amperage capacity
- Number of circuits
- Material and durability (metal vs. plastic, corrosion resistance)
- Safety features (GFCI, arc fault detection, surge protection)
- Smart or modular capabilities for energy monitoring and load management
- Outdoor vs. indoor rating (weather-resistant units carry a premium)

Bulk orders or OEM customization can reduce per-unit costs, particularly for modular or IP-rated enclosures. Modern distribution boxes may also integrate with building management systems, which can increase upfront costs but improve long-term energy efficiency and safety.

**Charging Cabinets** Charging cabinets are designed for safely storing and charging multiple devices or batteries. Prices vary based on number of ports, power output, and safety features:

- Small cabinets (4–8 ports) for tools or personal devices: \$100–\$300
- Medium cabinets (10–20 ports) for schools or offices: \$300–\$700
- Large cabinets (32+ ports, USB-C with Power Delivery 3.0, 576 W or higher) for commercial or institutional use: \$700–\$1,200+

Key features affecting price include:

- Port type and power per port (USB-C, AC outlets, Power Delivery)
- Safety mechanisms (overload, overcurrent, short circuit, voltage spike protection)
- Build quality (sturdy metal housing, lockable doors, ventilation)
- Mobility (caster wheels, compact design)
- Smart management (LED indicators, cable organization, device tra...
