

Price of Dual Power Supply Cable Trays

AI Overview

Cable trays for dual power supply setups typically range from \$15 to \$76 per unit, depending on material, size, and purchase volume. Pricing Overview For B2C purchases (e.g., Amazon or small-scale retail), cable trays suitable for dual power supply installations are generally priced between \$15 and \$34 per tray, with smaller or simpler trays available for as low as \$0.92 wholesale. These are ideal for home offices, small server setups, or personal projects, offering easy installation and moderate load capacity. For B2B or bulk purchases (e.g., Alibaba or industrial suppliers), prices vary significantly based on material, size, and load rating. Standard trays can range from \$0.80 to over \$76 per unit, with higher-end stainless steel or hot-dip galvanized trays at the upper end of the range. Bulk orders provide cost efficiency and are suitable for data centers, industrial facilities, or large-scale electrical installations. Material and Configuration Impact

Stainless Steel (304 or 316): Durable, corrosion-resistant, ideal for high-load or outdoor environments; higher price point.

Electrogalvanized or Hot-Dip Galvanized Steel: Strong, corrosion-resistant, suitable for medium to heavy-duty applications; moderate to high price.

PVC or Halogen-Free Plastic: Lightweight, fire-resistant, and weatherproof; generally lower cost, suitable for indoor or light-duty setups.

Tray Types: Ladder, wire mesh, basket, or single rail designs affect pricing, with ladder and heavy-duty trays typically costing more due to higher load capacity.

Accessories and Installation Costs Dual power supply setups may require additional components such as couplers, bends, risers, and lids, which can add to the overall cost. For example, medium-duty couplers are sold in pairs and may cost extra depending on material and finish (pre-galvanized or hot-dipped). Installation costs vary based on project complexity and labor rates.

Summary Small-scale/home use: \$15–\$34 per tray, simple materials, easy installation. Industrial/commercial bulk: \$0.80–\$76 per tray, depending on material,...
