

Price of Fireproof Galvanized Waterproof Cable Trays

AI Overview

Fireproof galvanized waterproof cable trays typically range from \$20 to \$150 per meter, depending on type, material, and load capacity.

Factors Affecting Price

Material: Galvanized steel is standard for indoor use and offers durability and corrosion resistance, while stainless steel or aluminum may cost more due to higher corrosion resistance and lighter weight. Fiberglass trays are non-conductive and suitable for electrical insulation but are generally more expensive.

Tray Type:

- Ladder trays:** Heavy-duty, ideal for large cable bundles, usually at the higher end of the price range.
- Solid-bottom trays:** Provide full protection for sensitive cables, slightly more expensive than ladder trays.
- Trough trays:** Moderate protection and ventilation, mid-range pricing.
- Wire mesh trays:** Lightweight and ventilated, often less expensive but suitable for smaller installations.

Fireproofing and Waterproofing: Trays with certified fire resistance (e.g., DIN 4102-12 or E90 standards) and waterproof coatings or seals add to the cost.

Size and Load Capacity: Wider or deeper trays that support heavier cable loads cost more. Standard widths like 100x60 mm or 200x100 mm are common, with larger sizes priced higher.

Accessories and Customization: Covers, clamps, bends, tees, risers, and powder-coated finishes increase the overall cost. Custom lengths or industrial-grade specifications also affect pricing.

Typical Price Range

- Small/light-duty galvanized trays: \$20–\$40 per meter
- Medium-duty solid or trough trays: \$50–\$90 per meter
- Heavy-duty ladder trays with fireproofing: \$100–\$150 per meter
- Custom or stainless steel trays: \$150+ per meter depending on specifications

Purchasing Tips

- Contact suppliers directly for bulk pricing or custom dimensions.
- Verify fireproof certification and waterproofing standards for safety compliance.
- Consider installation accessories like clamps, covers, and brackets to e...
