

Price of Large Low-Voltage Distribution Box

AI Overview

A standard low-voltage distribution box typically costs between \$50 and \$500, depending on specifications, materials, and features.

Cost Overview The price of a low-voltage distribution box varies widely based on several factors, including voltage rating, amperage capacity, number of circuits, material construction, and integrated safety features . Basic residential single-phase units generally start around \$50-\$150, while more complex three-phase or commercial-grade boxes can range from \$200 to \$500 or more . Outdoor-rated or weather-resistant enclosures usually carry a premium due to enhanced durability and protection against environmental conditions .

Factors Affecting Price

- Material and Construction:** Metal or polycarbonate enclosures are more durable and costlier than basic plastic units .
- Number of Circuits:** More circuits and higher amperage capacity increase the price .
- Safety and Monitoring Features:** Boxes with integrated circuit breakers, surge protection, or smart monitoring systems are more expensive .
- Customization:** Special mounting configurations, labeling, or integration with building management systems can significantly raise costs .
- Indoor vs Outdoor Use:** Outdoor cabinets require weatherproofing and corrosion resistance, adding to the price .

Examples of Available Options

- GEYA MCB Distribution Boxes:** Available in metal or modular polycarbonate, suitable for household or industrial use, with prices varying by size and configuration .
- Lucy Electric Low-Voltage Cabinets:** Indoor and outdoor options for multi-service distribution, designed for durability and ease of installation .
- Amazon Listings:** Small 12V DC distribution boxes for CCTV or access control systems start around \$50-\$100, while larger high-capacity units cost more .

Summary For a standard low-voltage distribution box, expect to pay \$50-\$150 for basic residential units and \$200-\$500...
