

Price of Middle Eastern Trapezoidal Cable Trays

AI Overview

The price of trapezoidal cable trays in the Middle East varies widely depending on material, finish, size, and supplier, typically ranging from \$20 to \$150 per meter for standard industrial grades.

Factors Affecting Price

Material Type: Cable trays are commonly manufactured from mild steel (MS), galvanized steel (GI), stainless steel (SS 304/316), aluminum, or GRP. Stainless steel and aluminum trays are more expensive due to corrosion resistance and durability, while mild steel is more cost-effective.

Finish and Coating: Hot-dip galvanization, powder coating, epoxy coating, or pre-galvanized finishes influence cost. Hot-dip galvanized trays offer better corrosion protection and are priced higher than powder-coated or pre-galvanized options.

Tray Size and Load Capacity: Trapezoidal trays come in various widths, depths, and thicknesses. Heavy-duty trays for industrial applications cost more than light-duty trays used for networking or fiber optic cabling. Standard lengths are usually 2-3 meters, with custom lengths available at additional cost.

Accessories and Fittings: Pricing also depends on elbows, tees, reducers, covers, and support brackets, which are essential for installation and directional changes.

Supplier and Location: Prices vary across the Middle East. UAE, Saudi Arabia, and Oman have multiple manufacturers like PSI, Ruwais Steel, Dana Steel, offering competitive pricing and export options. Local sourcing may reduce shipping costs compared to imports.

Typical Price Range

- Light-duty trays (networking, fiber optic): \$20-\$40 per meter
- Medium-duty trays (commercial applications): \$40-\$80 per meter
- Heavy-duty trays (industrial/power distribution): \$80-\$150 per meter
- Stainless steel or specialized finishes: Can exceed \$150 per meter depending on grade and corrosion resistance
