

Price of North Korean Photovoltaic Cable Tray Accessories

AI Overview

Exact North Korean photovoltaic cable tray prices are not publicly listed, but export data and global benchmarks suggest a range of \$20–\$80 per meter depending on material and type. North Korean Export Data North Korea exports cable trays, including those potentially used in photovoltaic (PV) installations, but detailed pricing is limited due to restricted trade and sanctions. Shipment records indicate that North Korean cable trays are exported in small volumes, with prices varying based on material, size, and shipment conditions (). The lack of open market data makes precise pricing difficult to confirm. Global and Regional Price Benchmarks For comparison, solar cable trays internationally are typically priced according to material and design: Galvanized steel trays: \$20–\$40 per meter Aluminum trays: \$30–\$60 per meter Stainless steel trays: \$50–\$80 per meter Fiberglass Reinforced Plastic (FRP) trays: \$40–\$70 per meter () These trays are designed for solar panel installations, providing cable support, protection, and management. Prices depend on load capacity, corrosion resistance, and environmental suitability. Factors Affecting North Korean PV Cable Tray Costs Material Type: Steel, aluminum, or FRP; corrosion-resistant materials cost more. Tray Design: Ladder, perforated, or solid-bottom trays influence price. Export Logistics: Limited international trade and sanctions can increase costs. Local Market Conditions: North Korea's PV projects often use modular or locally fabricated trays, which may reduce costs compared to imported systems (). Estimation Based on global pricing and North Korean export trends, photovoltaic cable trays from North Korea are likely in the \$20–\$80 per meter range, with lower-end prices for basic steel trays and higher-end prices for corrosion-resistant or specialized designs suitable for harsh environments. Conclusion While precise North...
