

Price of Swedish Explosion-Proof Lighting Distribution Box

AI Overview

Explosion-proof lighting distribution boxes in Sweden typically range from €1,000 to €5,000 per unit, depending on specifications, materials, and certifications.

Market Overview The Swedish market for explosion-proof power distribution boxes is growing steadily, driven by investments in mining, defense, chemical manufacturing, and battery production facilities. The market size is currently estimated at around €450 million, with annual growth of 2–3%. Regulatory compliance, such as ATEX and IECEx certifications, is mandatory for hazardous environments, which influences both product selection and pricing.

Factors Affecting Price

- Material and Build Quality:** Stainless steel enclosures (e.g., 316 stainless steel) and anti-static coatings increase durability and cost.
- Certifications:** ATEX, IECEx, and other international certifications for hazardous areas add to the price.
- Built-in Components:** Distribution boxes with pre-installed switches, indicators, and modular components are more expensive than empty enclosures.
- Customization:** Custom-engineered solutions for specific industrial applications, such as mining or defense, can significantly increase cost.
- Supplier and Brand:** Reputable manufacturers like Warom, MAM, and Atexor provide certified products with warranties, which can affect pricing.

Typical Price Range

- Standard Explosion-Proof Distribution Box:** €1,000–€2,500
- Advanced or Custom Configurations:** €3,000–€5,000 or higher, depending on complexity and certification requirements

Recommended Suppliers in Sweden

- Warom Technology:** Offers explosion-proof illumination distribution boxes with flameproof and increased safety chambers.
- MAM Ex Electrical Equipment:** Provides a wide range of certified Ex electrical equipment for industrial applications.
- Atexor:** Specializes in ATEX and IECEx certified lighting and distribution solutions, including custom designs.
