

Price of cable tray support 1.5 times wider

AI Overview

The price of a cable tray support increases proportionally with width, material, and length, typically ranging from PHP2,000 to PHP4,200 per unit for standard 3-meter sections, with wider trays costing more. Estimating Price Based on Width Cable tray supports are priced according to width, material, and finish. For example, RS offers 3-meter electro-galvanized steel trays at the following prices: 100mm wide x 60mm deep: PHP2,005 per unit 150mm wide x 60mm deep: PHP2,266 per unit 200mm wide x 60mm deep: PHP3,294 per unit 300mm wide x 60mm deep: PHP4,159 per unit If your standard tray is 200mm wide, a 1.5 times wider tray would be approximately 300mm. Based on RS pricing, this would cost around PHP4,159 per 3-meter section.

Factors Affecting Price

- Material:** Steel, stainless steel, aluminum, or electro-galvanized steel affect cost. Stainless steel is generally the most expensive, while galvanized steel is more economical.
- Finish:** Powder-coated or hot-dip galvanized finishes increase durability and cost.
- Length:** Standard lengths are 3m, 6m, or custom; longer sections increase unit price.
- Accessories:** Supports, brackets, and splice plates may add to total cost.

Practical Considerations

Wider trays support larger cable bundles but require stronger supports and may increase installation complexity. Ordering directly from suppliers like Graybar, Platt Electric, or RS may involve minimum order quantities and shipping costs. For precise pricing, it is recommended to contact suppliers with the exact width, material, and length specifications to get a formal quote. In summary, a cable tray support 1.5 times wider than a standard 200mm tray would likely cost around PHP4,159 per 3-meter section for electro-galvanized steel, with variations depending on material, finish, and supplier.
