

Price of high-voltage and low-voltage distribution boxes

AI Overview

Distribution box prices vary widely based on voltage, capacity, material, and customization, with low voltage boxes generally starting from \$50–\$200 per unit and high voltage cabinets costing several hundred to thousands of dollars.

Low Voltage Distribution Boxes Low voltage distribution boxes are commonly used in residential, commercial, and light industrial applications. Prices depend on specifications, OEM requirements, and order volume. Standard low voltage boxes typically range from \$50 to \$200 per unit, with wholesale or bulk orders reducing the per-unit cost. Customization options, such as busbar fitment, top cable entry modifications, and OEM branding, can increase the price. Delivery speed and factory capacity also influence cost, with stock items often available for next-day shipping.

High Voltage Distribution Boxes High voltage distribution cabinets are designed for industrial and heavy-duty applications, including manufacturing plants, data centers, and large commercial facilities. Prices are significantly higher due to enhanced durability, safety features, and capacity requirements. Typical high voltage cabinets can range from \$500 to several thousand dollars per unit, depending on voltage rating, amperage capacity, number of circuits, material construction, and integrated control systems. Outdoor-rated or weather-resistant enclosures carry premium pricing.

Factors Affecting Price

- Voltage rating and amperage capacity:** Higher ratings increase cost.
- Material and construction:** Stainless steel or corrosion-resistant enclosures are more expensive.
- Number of circuits and modularity:** More circuits or modular designs increase complexity and price.
- Customization:** OEM branding, specialized labeling, and integration with building management systems add to cost.
- Installation and maintenance:** Total cost includes installation, long-term maintenance...
