

Price of safety enclosure for electrical distribution boxes

AI Overview

Safety enclosures for electrical distribution boxes typically range from \$50 to over \$1,000 depending on size, material, IP rating, and customization options.

Price Ranges

- Small plastic or ABS enclosures for indoor use: approximately \$50–\$150. These are suitable for low-voltage or compact distribution boxes and offer basic protection against dust and accidental contact.
- Medium metal enclosures (aluminium or steel, IP55–IP65): typically \$150–\$500. These are common for industrial or commercial applications, providing higher durability, impact resistance, and protection against water jets or dust ingress.
- Large or customized enclosures (stainless steel, IP66–IP68, prewired, or with internal doors): \$500–\$1,500+. These are used for high-current distribution, hazardous areas, or outdoor installations, often including modular designs, safety isolation, and lightning protection modules.

Factors Affecting Price

- Material:** Plastic enclosures are cheaper, while stainless steel (304L or 316L) or powder-coated steel increases cost due to durability and corrosion resistance.
- Size and Capacity:** Larger enclosures for higher amperage or multiple circuits cost more. Splitter boxes for up to 600 A are at the higher end of the price spectrum.
- IP Rating:** Higher ingress protection (IP66, IP67, IP68) adds cost because of better sealing against dust and water.
- Customization:** Prewired boxes, internal doors, cutouts for pushbuttons, or thermal management features increase price. Some suppliers, like Schneider Electric, offer online configurators to get instant quotes for custom enclosures.
- Certification:** Enclosures for hazardous areas (ATEX, IECEx) or explosion-proof designs are more expensive due to compliance with safety standards.

Purchasing Tips

- Use online configurators from suppliers like Schneider Electric to get precise pricing for your specifications.
- Compare material and IP rating against your i...
