

Price quote for fiber optic cable protection box

AI Overview

Fiber optic cable connector protection boxes typically range from \$5 to \$50 per unit, depending on type, capacity, and supplier.

Overview of Fiber Optic Protection Boxes

Fiber optic protection boxes are designed to safely house, splice, and manage fiber optic connectors in FTTH, LAN, or outdoor networks. They are usually made from durable ABS plastic, offering IP65-rated waterproof, dustproof, and UV-resistant protection for indoor and outdoor installations. Common types include:

- Mini drop cable boxes:** Compact, supporting 1-2 SC or LC connectors, ideal for residential FTTH installations. These are typically priced around \$5-\$15 per unit for small quantities.
- Standard termination boxes:** Larger enclosures supporting multiple cores (up to 16 SC or 32 LC), suitable for commercial or multi-unit buildings. Prices generally range from \$20-\$50 per unit depending on capacity and features.
- Waterproof outdoor boxes:** Equipped with TPE sealing rings and snap-on designs for easy installation without tools. These boxes are often priced \$10-\$30 per unit for small-scale purchases.

Factors Affecting Price

- Capacity:** Boxes supporting more fiber cores or multiple connector types (SC, LC, FC) cost more.
- Material and durability:** Flame-retardant ABS, UV-resistant coatings, and reinforced sealing increase cost.
- Installation type:** Outdoor-rated boxes with IP65 protection and waterproof seals are more expensive than indoor-only units.
- Supplier and quantity:** Bulk orders from manufacturers in China or OEM suppliers can reduce per-unit cost significantly.

Purchasing Tips

- For residential FTTH projects, mini drop cable boxes are cost-effective and easy to install.
- For commercial or high-density networks, consider standard termination boxes with higher core capacity.
- Always check IP rating, material quality, and compatibility with your fiber connectors before purchase.
- Contact supplier...
