

Prices for Non-Cap Type Junction Boxes

AI Overview

Non-cap-type junction boxes typically range from £5 to £150 depending on size, material, and protection rating. Overview Non-cap-type junction boxes, also known as standard or terminal boxes without a removable cap, are used to house and protect electrical connections. Prices vary widely based on material (plastic, polycarbonate, aluminum, or steel), size, and IP protection rating (IP54, IP65, IP66, etc.). Small plastic or polycarbonate boxes for indoor use generally cost £5–£20. Medium-sized aluminum or steel boxes with higher protection ratings can range from £25–£80. Large industrial-grade or hazardous-area boxes designed for oil, gas, or chemical environments may cost £100–£150 or more. Factors Affecting Price Material: Polycarbonate and plastic are cheaper, while aluminum and stainless steel offer durability and higher protection. Size: Larger boxes with more internal space for wiring increase the cost. Protection Rating: IP66 or ATEX-certified boxes for hazardous areas are more expensive due to compliance with safety standards. Supplier and Brand: Established brands like Rittal, CE-TEK, and R. STAHL may charge a premium for quality and certification. Purchasing Tips Check supplier catalogs such as RS Online or Farnell UK for standard models and fast delivery. For hazardous or custom applications, request a quote from CE-TEK or R. STAHL, as prices are often project-specific. Consider bulk purchases to reduce per-unit cost if multiple boxes are required. By considering these factors, you can select a non-cap-type junction box that balances cost, durability, and compliance with your project requirements.
