

R730 optical port module

AI Overview

The Dell PowerEdge R730 optical port module is integrated into the front I/O panel and supports an optional optical drive, compatible with part number 4RK7R. Overview The R730 optical port module is part of the server's front I/O power panel, which includes ports for USB, VGA, and an optional optical drive such as a SATA DVD-ROM or DVD+/-RW drive. This module allows for easy access to optical media for software installation, system recovery, or data transfer. Compatibility Server Model: Dell PowerEdge R730 Part Number: 4RK7R (also listed as 04RK7R) Functionality: Front I/O panel with integrated optical drive slot and standard front ports Supported Drives: Optional SATA DVD-ROM or DVD+/-RW drives The module is designed specifically for the R730 chassis and is fully tested to ensure proper operation with the server's front panel functions. Replacement and Sourcing Replacement modules can be purchased from OEM parts suppliers or online marketplaces. When sourcing, ensure the part number matches 4RK7R to guarantee compatibility with the R730 server. The module typically comes with a one-year warranty from suppliers and is shipped ready for installation. Installation Notes The module is installed in the front panel of the R730 chassis. It connects to the server's internal SATA interface for the optical drive and integrates with the front I/O ports. No additional configuration is required beyond standard server setup once installed. This module is ideal for administrators needing optical media access without opening the server chassis, maintaining both convenience and system integrity.
