

Retail Price of Stainless Steel Cable Trays in South Africa

AI Overview

Stainless steel cable trays in South Africa typically range from approximately ZAR 400 to ZAR 1,500 per meter, depending on size, grade, and load capacity.

Price Factors

- Material Grade:** SS304 is commonly used for general industrial applications and is slightly less expensive. SS316 offers superior corrosion resistance, ideal for marine, chemical, or food and beverage environments, and is priced higher.
- Tray Size and Width:** Widths range from 50mm to 300mm, with larger trays costing more due to increased material usage.
- Wire mesh pitch and thickness** (4mm for medium-duty, 5mm for heavy-duty) also affect pricing.
- Load Capacity:** Light-duty trays are more affordable, while heavy-duty trays designed to support larger cable bundles or industrial installations are more expensive.
- Customization and Accessories:** Bends, tees, and crosses, as well as cut-to-length orders, can increase the overall cost.
- Lead times** for custom orders are typically around 15 working days.
- Supplier Examples:** Ceiling Power Pole supplies SS304 and SS316 trays in multiple widths and pitches, suitable for electrical, data, and solar cable routing. Steelcraft offers welded wire mesh stainless steel trays with customizable accessories and flexible installation options. Advanced Strut provides 304 and 316 stainless steel trays for corrosive environments, with options for light, medium, and heavy-duty applications.

Practical Guidance

For budget planning, expect ZAR 400–700 per meter for standard SS304 medium-duty trays. For high-corrosion or heavy-duty applications, SS316 trays can cost ZAR 1,000–1,500 per meter. Always request a quote from suppliers as prices vary with quantity, customization, and delivery location. By considering material grade, tray size, and load requirements, you can select the most cost-effective stainless steel cable tray solution for your project in South Africa.
