

Rwandan fiber optic cable snapped

Overview

Several countries in East Africa have suffered a drop in Internet services after it emerged that at least one subsea cable in the region has been cut. It's led to Internet outages across Kenya, Tanzania, Rwanda, and Uganda. CanalBox Rwanda technicians install aerial fibre optic cables in a Kigali neighbourhood fiber in the June, 2022. Millions of Canalbox customers in Rwanda and across Africa have been experiencing slow internet connectivity following major cuts of the company's submarine cables in West Africa, the. Millions of Canalbox customers across Africa are experiencing sluggish internet connectivity following major cuts of the company's submarine cables in West Africa, the company has publicly acknowledged. Information and Communication Technology players are looking at ways of building a secured broadband infrastructure protected from damage caused by construction activities that disrupt Internet connectivity. Consumers are forced to foot the cost of maintenance and operations as a result of damages. The Minister of ICT and Innovation, Paula Ingabire, has announced that Rwanda needs \$300 million to build additional telecommunications towers to ensure uninterrupted nationwide internet coverage. The perfect solution for individuals, homes, and businesses that need reliable, fast, always-on connectivity. High-speed, no-limit internet everywhere you go.
