

Thailand Overseas Warehouse Anti-tracking Optical Cable G 657A1

Overview

EasyBand® G657A1 bending insensitive single-mode fibre encompasses all the features of FullBand® fibre and provides good resistance to macro-bending. It has low macro-bending sensitivity and low water-peak levels. This supplier mainly exports to Trinidad and Tobago, Canada, and the US. 652, which describes its characteristics, has been adapted to this experience. Nevertheless, the specific use in an optical access network puts different demands on.

- Excellent bending resistance within the range of 7. 652 single-mode fiber
- Low attenuation, meeting the requirements of the O-E-S-C-L operating band
- Low polarization mode dispersion (PMD), meeting the needs of high-speed and long-distance.

The characteristics of a bending-loss insensitive single-mode optical fibre and cable for the access network. A2 fibres are fully compliant with ITU-T G. A2ITU-T (International Telecommunication Union) defines several single-mode fiber standards, including G.
