

# The UAE s special light cable is from British Telecom

## AI Overview

The UAE's special light cable is not from British Telecom; it is operated by regional telecom companies such as du, e&, Batelco, and Ooredoo. The UAE hosts several major submarine cable projects to enhance international connectivity. The PEACE Cable is extended into the UAE by du, providing ultra-high-speed, secure connections across Asia, Africa, and Europe. The Al Khaleej Cable, branching from SEA-ME-WE 6, is landed in the UAE through a partnership between e& and Batelco. Additionally, the 2Africa cable, one of the largest subsea systems globally, is anchored in the UAE by e&, connecting 46 landing stations across Africa, Asia, and Europe. The FIG cable system is being developed by Ooredoo Group to link multiple Middle Eastern countries, including the UAE. None of these projects involve British Telecom as a provider or operator. Instead, the UAE's subsea cable infrastructure is primarily managed by regional telecom operators, ensuring high-capacity, resilient, and secure international connectivity. These cables support the UAE's digital transformation, AI initiatives, and regional ICT hub ambitions.
