

There is a sound coming from the main electrical distribution box

Overview

These sounds suggest electrical energy is not flowing smoothly and may be “jumping” across air gaps, a condition known as arcing. Homeowners can perform a safe preliminary check by listening closely to localize the noise source. A buzzing noise coming from your electrical panel, often called a fuse box or breaker box, should be treated with urgency because it represents an electrical fault that is abnormal and potentially hazardous. A faint, low humming sound is sometimes a normal byproduct of alternating current (AC). Some common reasons for electrical humming or buzzing noises include: If electrical wires are not properly secured or damaged, they can vibrate and emit a humming noise. An overloaded circuit can. A breaker box (electrical panel or service panel) is the main distribution center for your home's electrical system. Faint Circuit Breaker Buzzing 2.
