

Three-port 86-type fiber optic information panel

AI Overview

A three-port 86-type fiber optic information panel is a flush-mounted network panel supporting fiber optic and Category 6 network connections, ideal for home or office high-speed networks. Key Specifications: Ports: 3 network ports supporting Category 6 cables and fiber optic connections (SC/UPC, SC/APC, LC/UPC, LC/APC) for high-speed data transmission. Dimensions: Standard 86 x 86 x 25 mm, suitable for flush-mounted installation within walls. Material: High-quality PP (polypropylene) material, lightweight and durable. Design: Concealed panel with a simple white finish, blending with interior decor. Some models feature spring-loaded dust covers to prevent debris from entering ports. Installation and Mounting: Flush-mounted: Requires embedding into a wall for a clean, professional look. Double-layered front and rear panel design: Enhances appearance and protects internal components. Identification: Panels often include identification paper and covers for easy maintenance. Applications: Home and office networks: Connects computers, routers, and other network devices for gigabit-speed transmission. Telecommunication networks: Suitable for FTTH (fiber to the home), metropolitan area networks, and optical fiber communication systems. Fiber broadband access: Can be used in CATV, fiber optic sensors, and optical fiber test instruments. Features and Benefits: High-speed performance: Supports gigabit networks and fiber optic connections for minimal latency. Durability: Tested for quality and reliability, often backed by 11-15 year warranties. Customizable: Some suppliers offer OEM services, allowing logo or label printing and design customization. Ease of maintenance: Dust covers and identification labels simplify network management. This panel is ideal for users seeking a compact, reliable, and high-performance solution for structured cabling in residential or commercial environments, combinin...
