

U-shaped fixing bracket for cable tray

AI Overview

U-shaped brackets are durable supports designed to securely fix cable trays, providing structural stability and corrosion resistance for industrial and commercial installations.

Overview U-shaped brackets are commonly used to mount and support cable trays, ensuring that cables are organized and safely routed. They are typically made from steel, stainless steel, or zinc-plated materials, offering anti-corrosion properties and the ability to withstand heavy loads and seismic activity. The U-shaped design provides robust structural integrity, allowing the bracket to hold trays firmly in place while maintaining alignment.

Types and Applications

- Floor-Mounted U Brackets:** Designed for cable trays positioned close to the floor, these brackets often feature dual side hooks that lock directly into the tray, providing a stable fit. They are ideal for data centers, server rooms, and industrial environments.
- Captive Fixing U Brackets:** Used to secure channels side by side on the same plane or connect horizontal to vertical channels, these brackets are suitable for complex tray layouts where multiple trays intersect or require precise alignment.
- Anti-Corrosion and Seismic Support Brackets:** Zinc-plated or coated steel brackets provide long-lasting durability and can handle vibrations or seismic activity, making them suitable for high-stress installations.

Installation Considerations Ensure the bracket size matches the width and type of cable tray (e.g., 60mm wire mesh baskets). Use appropriate fasteners for the mounting surface, whether concrete, steel, or other structural supports. For floor-mounted applications, verify that the bracket allows clean cable routing and does not obstruct maintenance access. Consider bulk or heavy-duty orders for large installations, as some suppliers offer trade pricing and custom lengths.

Material and Durability

- Steel or Iron:** Strong and cost-effective, suitable for most industrial applications.
- Stainless Steel:** Provides superior corrosion resistance, ideal for humid or outdoor environments.
- Zinc-Plated Steel:** Offers a balance of strength and corrosion resistance.
