

Ultimate New Light Transmission Module

Overview

New 'Ultra Thin Pixel Lighting Module' wins CES 2026 Innovation Award. Silicon optical components reduce thickness by 71%, offering customers greater design freedom. LG Innotek (CEO Moon Hyuksoo, 011070) announced on November 7, 2025, that it has been honored with a CES 2026 Innovation Award for its newly developed 'Ultra Thin Pixel Lighting Module' for automobiles. On November 21, 2024, LG Innotek announced that its 'Nexlide A+ automotive lighting module' received the CES 2025. Nexlide-A+ is an automotive front lamp lighting system featuring multiple light source packages mounted on a slim circuit board. Delivers diverse text and animated effects, advancing V2X communication capabilities. 10, 2025 /PRNewswire/. The AgiLight team is excited to introduce the ULTRA Lyte and PRO Lyte modules, which add true value options to the 12V ULTRA and 24V PRO Premium product families. See them live at the ISA International Sign Expo in Orlando, starting today! We're in Booth 2501! These new modules have been engineered. ENGINEERING WONDER ☐☐ Tesla has transformed the windshield into an active optical shield with wire-grid-free transparent-film heating ☐☐ For over a century, automotive glass had a simple, entirely passive job: shield the cabin from wind, rain, and road debris while remaining transparent enough for.
