

Vietnam FOB Price Fiber Optic Fusion Splice Box 24 Cores

AI Overview

The FOB price for a 24-core fiber optic fusion splice box in Vietnam typically ranges from \$15 to \$50 per unit, depending on quality, material, and supplier, but exact pricing requires direct supplier quotation.

Product Overview A 24-core fiber optic fusion splice box is a critical component in fiber optic networks, providing secure termination, splicing, and protection for multiple optical fibers. These boxes are designed for indoor or outdoor installation, with weatherproof and rugged enclosures for outdoor use, and compact wall-mounted designs for indoor applications. They often include labeled splice trays to organize fibers and maintain proper bending radius, ensuring minimal signal loss.

Typical Pricing Considerations

- Material and Build Quality:** Boxes made from high-grade ABS or polycarbonate with weatherproof seals are priced higher than basic indoor models.
- Functionality:** Hybrid boxes that combine splicing and patching functions or include splitter termination may cost more.
- Volume Orders:** Bulk purchases can reduce per-unit FOB costs due to economies of scale.

Based on international supplier listings, FOB prices for standard 24-core splice boxes from China range roughly \$15–\$50 per unit, depending on specifications and order quantity. Shipping to Vietnam may add freight costs, but FOB pricing covers delivery to the port of shipment.

Sourcing Tips Contact local distributors or Chinese suppliers who ship to Vietnam for precise FOB quotes. Verify certifications and quality control to ensure durability and compliance with network standards. Consider additional accessories like fusion splice trays, mounting brackets, and splitters, which may affect total cost.

Conclusion While the exact FOB price in Vietnam varies by supplier, order size, and product features, a reasonable estimate is \$15–\$50 per 24-core fiber optic fusion splice box. For accurate pricing, it is recommended to request quotes fr...
