

What router is best to pair with a 5000 Mbps fiber optic connection

Overview

Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. This table should be useful so you can compare each of my top picks and see the differences in their features, price, and suitability. After conducting thorough tests for over two months, only 7 models made the cut based on multiple parameters. Article Summary: This guide explores the best WiFi routers for faster speeds and better wireless performance for your whole. In this guide, I'll share my hands-on experience with the top routers that maximize fiber performance without breaking the bank. Our ratings (out of 10) are editorial assessments based on product.
