

What to do if you don't have a broadband fiber optic cable

Overview

If you don't have (or want) a physical cable connecting your home to the internet, you can still connect with a wireless internet connection. But what do you do when fiber optic internet isn't available or practical due to location, infrastructure limitations, or common fiber internet issues?

While fiber networks are expanding, many businesses and properties, especially those in remote or underdeveloped areas, still struggle with access. Each has its pros and cons, so we're here. Looking for internet without cable or phone line?

You're not alone. Many people are cutting the cord and ditching landlines. Over 30% of renters run into internet trouble because there is no cable jack and drilling is banned by property. This guide offers practical, actionable strategies for residents and businesses in areas lacking fibre, exploring alternative solutions and how to advocate for future upgrades. Discover how to maximise your current connection and prepare for the next generation of broadband.
