

What types of fireproof cable trays are available in Bahrain

Overview

This article dissects the two primary solutions outlined in common specifications: Aluminized Polypropylene Scrim Encapsulation (Wrapping) and Intumescent Fire-Resistant Painting (Coating). Selecting the appropriate fire protection system for fire resistant cable trays in high-stakes projects—especially in regions like the Middle East with extreme climates and frequent potential for explosive atmospheres—is a critical decision impacting safety, compliance, and lifecycle cost. Effective protection of cable systems around the world: our SFSP FRP Cable management System is manufactured under the brand name “Intech”, and is distributed exclusively by Unitech for Building and Construction Materials in the GCC and Mena regions. Electrical fires can spread rapidly through the cables within a tray system, which is why choosing the right material for your cable tray is paramount in reducing the risk.
