

Where is the router s fiber optic terminal box

Overview

An ONT, or Optical Network Terminal, is the box where your fiber internet connection enters your home to power your fiber network. What is the Openreach box on your wall?

It's called an Optical Network Terminal, or ONT. It's not a router, and it's not a traditional modem. Here's a more detailed breakdown of typical ONT locations:

Garage: This is a very common spot, often chosen for ease of access for technicians and. The optical network terminal (ONT) is the critical component that converts fiber optic signals into data your devices can use. Before. Fiber internet works by sending data as beams of light through tiny glass strands (yes, really!). But your home devices — like your laptop, smartphone and smart TV — can't interpret light signals.
