Overview

Mouser offers inventory, pricing, & datasheets for MPO Adapters Fiber Optic Connectors. An MPO adapter (also called an MPO coupler) is a passive fiber optic component used to connect two MPO connectors together. This ensures a stable and accurate connection, allowing optical signals to pass between them with low loss. They are designed to support multiple optical fibers in a single. High-density adapters engineered for MPO/MTP® fiber systems, ensuring precision alignment, reliable performance, and space-saving design for modern optical networks. The US Conec's MTP® brand adapters are fully compliant with IEC Standard 61754-7 and TIA 604-5. The MPO-PLUS® connector is the pinnacle of multi-fiber development, representing the most precise, feature-rich MPO connector on the market. SENKO is leading the way in low-loss MPO ferrules that exceed the standard and deliver the maximum amount of network agility and link performance to deliver.
